Live Arrangements

Whether you are looking for an orchid arrangement for a special event, or as an added touch of class to your home decor, live arrangements go further than cut flower arrangements. Phalaenopsis arrangements can last several months; most orchids arrangements will last 6 weeks or more. The orchids stay in their own pots (no transplanting needs to be done) and are artistically combined with greenery and accessories in a designer pot, to create the look you are searching for. For orchid arrangements, leaving the plant in its own pot allows plant combination that would be impossible otherwise due to differences in watering frequencies; by proceeding this way, the orchid can be watered separately. Designer pots should have a drainage hole since orchids dislike sitting in water. Curly willow and other twigs as well as grasses, seed pods, feathers and mosses can be added for effect.

Cyclamen arrangements are charming and affordable. Available in 3 sizes, in white, red, pink, mauve and combinations thereof, the lower profile of a cyclamen arrangement is ideal for table center pieces.
