Pterostylis (Dunkle x baptistii)

This terrestrial orchid is native to Australia and has very unusual white and green flower with brown suffusion that intensifies with age.

Light: Moderate light.

Temperature: Cool growing.

Watering: Keep evenly moist but not wet when in growth; keep on dry side after growth dies back and plant is dormant.

Fertilizing: Fertilize with 28-14-14 at half strength, once a month.
