Stenoglottis longifolia

Numerous small lavender spotted flowers open sequentially on upright stem. Individual flowers last 5 to 7 days; the plant will bloom for 4 to 8 weeks depending on plant maturity.

Light: Moderate to high light.

Temperature: Cool growing.

Watering: Keep evenly moist but not wet, can occasionally dry out.

Fertilizing: Fertilize with 28-14-14 at half strength, once a month. In summer, fertilize with 10-30-20 at half strength until blooming.
